

## Summercore Evernote Exercises

- ❑ #1 Using copy and paste make your name appear here 33 times between the lines.
- ❑ #2 Using the special keys try to replicate these short sentences with the symbols.

¿Evernote es difícil? Evernote est la flexibilité. Evernote mañana.  
Evernote für immer. Evernote costs less than 33¢.

- ❑ #3 Using Evernote Web Clipper, take a screenshot from a map that includes the location of your school, home or business.
- ❑ #4 Using SKITCH please markup with arrows and label 3 places of interest on this map and then include it here.
- ❑ #5 Using the record feature of Evernote, please make an audio recording that does not exceed 33 seconds and provides the listener with some info about the above map that is not indicated by the 3 arrows.

TIP for #1: You can highlight a word by double clicking on the iPad. Or you can click and hold, dragging and choosing SELECT. Once your name is selected, you can then COPY, click in the white, perhaps putting in a space and then clicking and holding to choose PASTE. You don't need to paste 32 times even though you can do it that way. Once you have your name 3 or 4 or 5 times, you can highlight all of them and then PASTE to get to 33 more quickly!

TIP for #2: On the iPad, the special characters are hiding under the normal keys and you can get them by clicking and holding on the key. So clicking and holding on the "e" key gives you the é option hiding underneath. Beware that the ? question mark on the main keyboard does not yield the ¿ symbol but the ? question mark on the punctuation ?123 keyboard does include it.

TIP for #3: You can add this little utility to your browser by going to <http://evernote.com/webclipper> and adding it to the browser of your iPad, your Mac or your PC. This clever utility makes it easy to save a screen snapshot of a web page, even though you can do so by other computer techniques.

TIP for #4: You can download SKITCH to your computer by going to <http://evernote.com/skitch> or you can download it to your iPad. SKITCH allows you to add text and colorful arrows to your graphic, it allows you to mark up a PDF file. SKITCH uses the same login and password as EVERNOTE and syncs with it.

TIP #5: On your iPad, you will see an icon of a microphone. Using this icon, you can record an audio clip that appears on the screen and allows the listener to play back. Evernote on your computer may not contain this icon.
