- This is a great website where students can see various 3D shapes (which are often hard to draw in real life). They can create interactive 3D shapes and view nets of 3D figures which will help with surface area. [3D Shapes](#)

- This website allows you to create graphs using slope and intercept.

Students can manipulate the graphs online seeing the effects of coefficients etc. without having to draw all the different graphs. Also comes with an activity page. [Slope Intercept Activity](#)

- Fun Algebra game where students solve equations with one variable in order to keep the Nuclear reactor from exploding. Great option for students to have fun extra practice. [Nuclear Algebra Game](#)

“Stand firm in your refusal to remain conscious during algebra. In real life, I assure you, there is no such thing as algebra” - Fran Lebowitz¹
